

# PROJECT BRIEF

## PROJECT BRIEF

PROJECT: Government Department Transport  
LOCATION: Melbourne VIC  
INSTALLER: VQuip  
PRODUCT: Polysafe Vogue Ultra PUR – Blackbird 5560

Polyflor's Polysafe Vogue Ultra range was chosen to fit out the latest government department transport vehicle. Wear and tear in vehicles is not uncommon and there are instances where passengers may have wet feet making the floor slippery, so Vogue Ultra 'Blackbird 5560' was the ideal flooring solution. Vogue Ultra features PUR reinforcement providing superior cleaning benefits and optimum appearance retention and incorporates

quartz, aluminium oxide, silicon carbide particles and natural aggregates to improve traction and safety underfoot with slip resistance assured for the guaranteed life of the product. Mark Sangster of VQuip commented, "the reason we chose this particular flooring is it is extremely hard wearing and still looks new even after high traffic for many years". He also added, "we can also lay the width of the flooring without any joining".
