

# PROJECT BRIEF

## PROJECT BRIEF

PROJECT: Mobile Mouthguards  
LOCATION: Melbourne VIC  
INSTALLER: VQuip  
PRODUCT: Expona Superplank – Ghost Gum 1953  
KIESEL: Okumal PU

Mobile Mouthguards travel around Melbourne to various sporting clubs making mouthguards on-site. The vehicle was fitted out with Expona Superplank 'Ghost Gum 1953' which complemented the contrasts of orange, green and black used in the furnishings. Superplank features timber inspired designs with realistic surface textures and being a commercial quality flooring that is hard wearing and easy to clean, the range

was fit for purpose. Combined with the use of our Kiesel adhesive Okumal PU which is a solvent-free low emission two-component polyurethane resin adhesive, Mark Sangster of VQuip commented "I was impressed with how easy Superplank went down" and also added "the client selected the Superplank range based on the colour choice".
