

# PROJECT BRIEF

PROJECT: BP Logan Motorway  
LOCATION: Logan QLD  
ARCHITECT /DESIGNER: acrd  
INSTALLER: All Floors Commercial  
PRODUCTS: Expona Design – Cool Grey Concrete 7237 & Warm Ash 6168  
KIESEL: Okatmos star 100

BP Logan Motorway is located off the Logan Motorway in a rapidly growing industrial area south-west of Brisbane. The newly BP is not only a service station but also features a convenience store, restaurants, cafes and restrooms making this an ideal pit stop for motorists. For this reason due to the high volume of traffic flow each day, the flooring needed to be hard wearing and low maintenance. Enter Expona Design which is a commercial quality grade vinyl flooring designed to withstand heavy traffic and is easy

to clean with the inclusion of the polyurethane surface treatment. As the product name suggests, the Expona Design range has a wide variety of colour and pattern choice; Cool Grey Concrete and Warm Ash which are realistic replications of concrete and timber, yet more cost effective and easier to maintain, were chosen for the project fit-out. The Cool Grey Concrete tile and Warm Ash plank are the perfect accompaniment to the décor and furnishings throughout the BP Logan Motorway.
