

PROJECT BRIEF

PROJECT BRIEF

PROJECT: JUMP! Swim Schools
LOCATION: Mornington VIC
PRODUCT: Polysafe Standard – Arctic Blue 4130
KIESEL: Okatmos star 100, Servoplan R 300 S & ServoFine F 333

JUMP! Swim Schools have 22 aquatic centres throughout Australia and are a specialised facility to teach babies and infants critical skills and help them build confidence when in the water. Polyflor's Polysafe Standard range was specified for their newest centre in Mornington which is designed for heavy traffic areas where there are risks of water spillage. Coloured quartz, aluminium oxide and silicon carbide particles have been incorporated in the

vinyl to improve traction and safety underfoot, providing sustainable slip resistance assured throughout the guaranteed life of the product. The floorcovering is also reinforced with Polysafe PUR for optimum appearance retention. Arctic Blue 4130 was the perfect colour selection for the aquatic swimming school and ties in with the vibrant mural of the ocean in the background.
