

PROJECT BRIEF

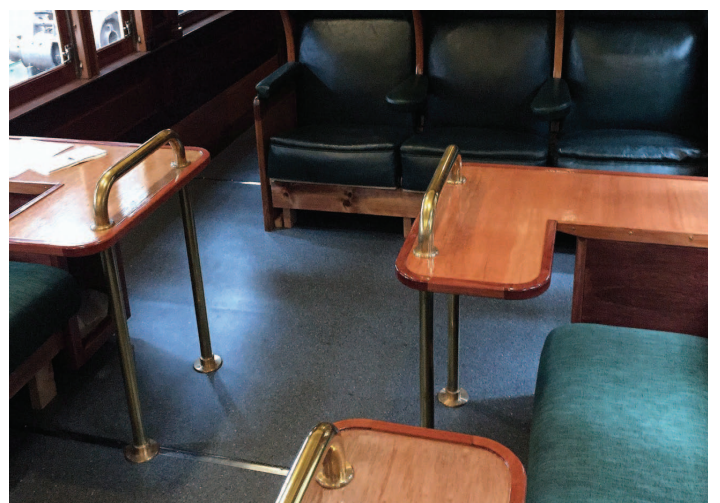

PROJECT BRIEF

PROJECT: 3801 Limited – Heritage Train Refurbishment
LOCATION: 2 Locomotive Street, Eveleigh NSW
PRODUCT: Classic Mystique – Nocturne 1380

Originally a TAM sleeping car that dates back to the July-August intake of 1937 and built by Ritchie Bros in Auburn NSW for the New South Wales Government Railways, the heritage train was completely restored and is now used for tours from Sydney to Wollongong. Part of 3801 Limited fleet, the refurbishment required new flooring throughout each carriage; enter Polyflor with a range of quality and durable flooring solutions suitable for transport projects. Todd Rowling of 3801 Limited said, "The

heritage railway carriage we restored required quality flooring throughout the corridors, compartments and lounge areas. As a marginal business, we at 3801 Limited had to be sure that we selected modern materials that offer a cost effective solution with long service life, toughness and ease of cleaning and this is why we chose Polyflor's Classic Mystique vinyl flooring range. It comes in a range of great colours as well as being ideal for high traffic areas."
